**PRIMARY ROUTES OF EXPOSURE:** Ingestion, dermal contact.

**EYE EXPOSURE:** Remove contacts if present. Immediately flush the eyes with water for at least 10-15 minutes. Seek medical attention if irritation persists.

**SKIN EXPOSURE:** Wash the affected area with soap and water. Remove contaminated clothes if necessary. Seek medical assistance if irritation persists.

**INHALATION:** If breathed in, move person to fresh air. If not breathing, give artificial respiration.

**INGESTION:** If the person is conscious, rinse their mouth out with water. Never give anything by mouth to an unconscious person. If ingested, do not induce vomiting unless directed to do so by medical personnel. Seek medical attention.

## SECTION 8: Exposure Controls and Personal Protection

---

The recommendations in this section should not be a substitute for a personal protective equipment (PPE) assessment performed by the employer as required by 29 CFR 1910 Subpart I.

### CONTROL PARAMETERS: EXPOSURE LIMITS

Triethanolamine (102-71-6)  
US. ACGIH Threshold Limit Values  
Time Weighted Average (TWA): 5 mg/m<sup>3</sup>

US. ACGIH Threshold Limit Values  
Time Weighted Average (TWA): 5 mg/m<sup>3</sup>

Any component which is listed in section 3 and is not listed in this section does not have a known ACGIH TLV, OSHA PEL or supplier recommended occupational exposure limit.

### EXPOSURE CONTROLS:

**APPROPRIATE ENGINEERING CONTROLS:** General industrial hygiene practice.

### PERSONAL PROTECTIVE EQUIPMENT:

**EYE PROTECTION:** Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

**SKIN PROTECTION:** Wear protective clothing and gloves.

**VENTILATION:** General dilution and local exhaust as necessary to control airborne vapors, mists, dusts and thermal decomposition products below appropriate airborne concentration standards/guidelines. Thermal processing operations should be ventilated to control gases and fumes given off during processing. Curing ovens must be ventilated to prevent the buildup of explosive atmospheres and to prevent off gases from entering the work place.

**RESPIRATOR:** Respiratory protection not required. For nuisance exposures use type OV/AG (US) or type ABEK (EU EN 14387) respirator cartridges. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU) during high temperature processing or when thermal decomposition is suspected.

**ADDITIONAL PROTECTION:** Employees should wash their hands and face before eating or drinking. Educate and train employees in the safe use and handling of this product. Store separate from food products.
